

The towing specialists Hayman Reese have recently released a Hayman Reese Mazda BT-50 heavy duty towbar with a step and lamp protection and the unique capacity to fit safety accessories including reversing sensors and camera.

The new **Hayman Reese Mazda BT-50 Towbar** is a heavy duty Hitch Receiver with built in step and lamp protection. The Towbar is rated to a massive towing capacity of 3000/300 and with a 50 x 50mm hitch box the Hitch Receiver is a must if towing caravans, large trailers, boats or horse floats.

If the above is not a good enough reason to buy the **Hayman Reese Mazda BT-50 Towbar**, it also has the unique capacity to have safety accessories fitted including reversing sensors and camera. Simon Rodwell, the Hayman Reese Product Manager, stated 'In most cases fitting steps and/or lamp protection means that safety reversing sensors can not be fitted. Therefore the team at Hayman Reese considered it important that we built a towbar with the ability to accept safety accessories particularly in the case of the Mazda BT-50 which has poor rear visibility especially when fitted with a canopy.'

The **Hayman Reese Mazda BT-50 Towbar** has a RRP of \$737 and comes with a lifetime warranty. The safety accessories can be bought separately from Hayman Reese at an additional cost.

The Hayman Reese Mazda BT-50 Towbar is part of an extensive range of **Hayman Reese** products and is available from **Hayman Reese** Distributors nationally. To find your nearest dealer visit www.haymanreese.com.au
