

Is the 'ultimate' battery charger simply a dream?

Boat owners, RV adventurers and other heavy duty battery users dream of an 'ultimate' battery charger - one that can be counted on to charge 1, 2 or even 3 battery banks; one that blows other chargers out of the water with efficiency; one that has a huge input range and can be used across every kind of battery. Do *you* dream of a charger you can completely rely on to keep the good times going for the long haul?

Bainbridge Technologies now brings your dreams to life, with the exceptional features and benefits of the **Sterling Power Pro Charge Ultra**:

ultra efficient – innovative "power factor correction" makes it 40% more efficient than traditional chargers. Not only does that save you money on energy costs, it also helps save our world by reducing your carbon footprint.

amazingly versatile – complete with 11 pre-programmed battery charge curves including LiFePO₄, GEL, AGM, FLA and calcium, it can even be programmed (without a computer!) for any other type of battery - including lithium.

incredibly practical – featuring a 32 LED panel, it displays everything you want to know and need to know to give you complete peace of mind and control.

totally dependable – a huge input range (80 – 270v, 40 – 70Hz) supports it to smooth out even the dirtiest power for ultimate performance and protection against power fluctuations.

adaptable and durable – operates from marine shore *or* generator input and made of rust resistant marine grade materials to last a long, long time.

Does it sound too good to be true? It's real, and it's been recognised internationally as the ultimate charger with the **Pitman Innovation Award** (Sail Magazine, USA), the **Premium Product 2010 Award** (Sailing Today Magazine, UK) and the **Innovation Award** (IBEX 2010, USA).

Stop dreaming now, and check out the [YouTube video](#) (available at www.baintech.com.au/sterlingpro) to find out how the **Sterling Power Pro Charge Ultra** can fit into *your* power system!
